## EDITORIAL - Dog Poop Emergency!

Do you exercise your dog at the Recreation Ground Oval?

Do you just let your dog run around off the lead?

Do you take notice if and when they do a poop on or around the oval?

**DO YOU PICK UP THEIR POOP?**

It has become such a big problem where owners are not picking up their dog poop at the oval now that there is talk of banning dogs altogether from the oval. Kids and adults are using the oval pretty well every day for either training or games and before anyone can use the oval or even walk around the oval someone has to do a poop hunt and pick up all the dog poop.

Is this fair and reasonable? We don't think so!

So you may ask why should I pick up my dogs' poop? Well in the first place it is being respectful for all the other users of the oval including all the owners who do the right thing. Secondly it is bad for the environment. Dog poop is classified as toxic waste and is in the same category as chemicals and oils spills. Dog waste contains pathogens and nutrients that cause growth of weeds and algae.

And dog poop poses a health threat to people and other pets. It contains parasites and germs that can be harmful such as roundworms and hookworms that can live in the soil for a long time and can be easily transmitted. Even E-coli can be transmitted and if your dog is a carrier for

parvo or coronavirus then you can infect puppies or young dogs who may not have good protection yet from their vaccinations.

If you think that dog poop is a natural fertilizer, then you are misguided. Dog poop is not good for the soil and because dogs are omnivores and their diets are high in protein their feces is so high in nitrogen and phosphorus it can burn grass if not picked up. Dog poop can take up to ONE YEAR to decompose and even then, the bacteria and parasites can remain in the soil.

And finally, if you have ever trodden in dog poop then you know how hard it is to get out of the treads of your shoes and imagine what it would be like for the kids and players to fall over on your dog's poop. We are sure you would not like it!

So be considerate of others and always monitor your dogs and if they do a poop then pick it up and put it in the bin! There are always disposable dog poop bags available at the oval so do the right thing.

If there are any dog owners who see other owners not doing the right thing then say something to them or get their car rego number, the type of dog and the name of the dog if you hear it and let one of the recreation ground people know about it, even if you do it anonymously by writing a note and putting it in the clubrooms.

We want the recreation ground to be a community asset that everyone can use so don't spoil it for others and do the right thing by picking up your dog's poop.

## PLEASE TAKE NOTE

Opinions and articles printed in the Cherry Chatter are not necessarily shared by the members of the Cherry Chatter Committee.

NOTE – The Cherry Chatter Committee will not approve any controversial article for publishing unless the name and address of the author is supplied.

## RAINFALL REPORT FOR JUNE

### Cherry Gardens Rainfall

## HALL NEWS

### CHERRY GARDENS

#### MEMORIAL HALL FOR HIRE

Available for hire for all functions,  
meetings & social occasions  
Very reasonable rates  
For bookings and more information  
phone 8270-2232

## HALL NEWS

We recently had discussions with the RSPCA, who are looking for locations to run their Dog Training sessions. They were delighted with what the Hall had to offer, and we hope that over the coming months classes will start at the Hall.

\*\*\*\*\*

We are also pleased to announce that the Hall has been successful in attracting some grants from the Onkaparinga Council in the 2019 round. The grants will enable us to install new refrigerators in the kitchen, purchase new A frame boards to promote upcoming events and, most importantly, extend the rear storage area to provide additional space for the table tennis tables, floor cleaners, tables, chairs, barbecues etc. Thanks to our secretary Helen Whittle who put a lot of energy into the preparation of the grant documentation.

# Community Campfire

Hall carpark

**Sat 14<sup>th</sup> Sep 5 – 8 pm**

Bring the kids ...

Catch up with neighbours ... meet new ones

**Soup & Damper, Sausage sizzle,  
wine, cake & coffee  
BYO seats  
See you there!**

Remember to visit the Hall Facebook page, <https://www.facebook.com/cherrygardens/>. We will be acknowledging the Lions assistance, and you will be kept updated on functions and other happenings at the Hall.

## CHERRY GARDENS CFS

*We train every Monday night for those who may be interested in what we do.*

To report suspicious behaviour call Crime

Stoppers on 1800 333 000. For all other emergencies dial 000 and ask for "Adelaide, Fire" "South Australia"

At the time of writing, things are relatively quiet in Cherry Gardens and this gives us an opportunity to keep improving the station. The training area floodlights to the west of the station are now installed and operational and as always, we continue with our training schedule. As a Brigade, we have a dedicated hardworking group amongst us who give their time to form the "Sturt Group Operations" team. Cherry Gardens CFS is in Region 1, which covers the Mt Lofty Ranges and Kangaroo Island, and we are in the Sturt Group. There are five Brigades in the Sturt Group, the others being Belair, Blackwood, Coromandel Valley and Eden Hills. The role of the Sturt Group Operations (Sturt Base) team is to provide support to the five Brigades in the Sturt Group, primarily through Communications. The

Group has two radio communication bases, located at Cherry Gardens and Belair stations. Each of these has a number of radio operators, and the two teams take turns, week about, responding to callouts.

When a CFS Brigade is required to attend an incident, the information is relayed from Adelaide Fire (the MFS headquarters in Wakefield St) through a pager system. Brigade members respond to their respective stations and go mobile to the incident. Each member of the Operations Team is also issued with a pager and if one of the Brigades in the Sturt Group is called out, members of the Operations Team are notified through their pager. In most cases, the Operation Support members travel to the station and set up a radio base/communication center to assist and co-ordinate the incident. As radio communication is required as soon as an appliance leaves a station, the initial coordination is provided from the person's home using portable radios – these are taken home/carried on a rostering system. As with firefighters, this coverage is provided 24 hours a day and 7 days a week.

Depending on the incident, Sturt Base can become an extremely busy area – all arrivals and departures are recorded, as are all radio messages. The entire incident is captured and managed on a detailed whiteboard to view and manage the big picture. This shows which vehicles have been paged, which are mobile and which vehicles have arrived. The Base is very much the support for all everyone in the field – resources such as Police, Ambulance, SA Power Networks, water bombers, extra appliances - anything needed for an incident is all arranged through the Sturt Base.

As the Cherry Gardens Base covers the whole of the Sturt Group when it is rostered, the members often

complete many more incidents than the fire-fighters from Cherry Gardens. They provide an invaluable role, keep operations running smoothly and safely and their efforts are always greatly appreciated by the operational units. By definition, any CFS appliance either travelling to or at an incident is highly visible, but without the background support of our radio operators coordinating and operating Sturt Base we would be severely restricted in what we could achieve.

Sturt Group Operations - a very valuable part of the CFS team at Cherry Gardens!

## WELCOME

The Cherry Chatter committee would like to welcome the newly settled families who have recently moved into the Cherry Gardens area. We hope you love living here as much as we do.

## WELCOME PACKS

If you are new to the area and have not yet received a welcome pack, please contact the editor at [cherry chatter@yahoo.com](mailto:cherry chatter@yahoo.com) with your address.

Like us! <https://www.facebook.com/92CherryChatter/>

## CHERRY GARDENS GARDEN CLUB

Meetings are held in the Cherry Gardens Uniting Church meeting room, at 7.30pm usually on the 2<sup>nd</sup> Monday of the month from February to November.

**President:** Ray Wise: [raywise@hotmail.com.au](mailto:raywise@hotmail.com.au)  
0405 273 003

**Secretary:** Shirley Callaghan: [shirleyc5159@gmail.com](mailto:shirleyc5159@gmail.com)  
0403 801 916

## Next Meetings

**Monday 12th August** - AGM - All positions become vacant, so we welcome in a new committee. The election will be followed by a gardening quiz.

**Monday 9th September** Richard Heathcote from Carrick Hill will entertain us with a history of garden tools.

**Monday 28th October** we will be celebrating our 20th birthday with a community dinner, supported by the City of Onkaparinga. Watch this space for further details

### **George's Gardening Suggestions For August 2019**

Pruning should be completed this month; I know it has been a weird season for roses.

Spray fruit trees with white oil to clean up over-wintering pests, and at bud swell on peaches and nectarines use a leaf-curl fungicide

August is a good time to prepare new vegie patches, remember to dig in plenty of old compost.

Prune shrubs after flowering, fuchsias can be reduced by two thirds.

Re-pot plants with good quality potting mix - increase pot size by no more than 50%.

Aerate lawns to reduce compaction in high traffic areas by spiking with a garden fork. A coring machine will be required for larger areas.

You may need to start watering in warmer, but particularly windier, conditions.

Feed bulbs on a balanced 5:5:5 fertilizer ( if you can find it ) because they have limited foliage but require phosphates to develop bulbs and potassium for flowers. Next year's flowers are formed after current flowers so look after them for a few more weeks.

Plant seeds or seedlings of Californian poppy, celosia, African marigold, petunia, phlox and portulaca.

### **Cherry Gardens Garden Club June 2019 Meeting**

What a great way to warm up – Freebies night!

In June each year, each attending member places their donated gardening related gift on a table to swap. After the business meeting segment, participant's names are placed in a container so each winner draws the name of the next person to choose a gift, ensuring that whoever brought a gift can choose one off the table. I was so excited to get the first draw and chose a 2 litre bottle of Liquid Blood and Bone ready for my spring garden fertilizing. Gifts ranged from potted flowering plants, garden tools and gloves, tea bags, footsoak to ensure a good end to a long gardening day and a range of garden ornaments. Great hilarity was evoked at people's explanations of their choices and other members' comments about those choices.

The next item was from our speakers, who this month, were from within the garden club. As a continuation of our ongoing – "Get to know each other" member participation at various appropriate times in the year, up to three members will share something about their interests, skills, employment, travel, a book they have read, or any other subject, but more often including garden related matter.

Our President Ray Wise gave us a demonstration of fruit tree grafting, complete with a visual aid of ready cut rootstocks and grafting segments from pear and apple trees, He had prepared several and encouraged us to have a try, or take them to graft at home.

Nerida shared the most interesting, comical, enlightening, heart-warming and endearing interactions with adult, youth and child shoppers from her work at a

local nursery. To the experienced gardener, some of the requests might seem outrageous, but many of us have been at that stage and it just shows what a valuable resource well trained, experienced, insightful and empathetic nursery staff can be.

Our third speaker - from Cherry Chatter, was George whose interesting reading was from a book on Joseph Banks' arrival and his activities in Australia.

Yes! winter warmers this year certainly warmed us - in both heart and body - very well.

There were many interesting plants brought by members to the auction table, among them Spider Lily bulbs. A great contribution was a big parcel of Bella Donna lilies which will make a colorful display in the purchaser's gardens at the end of summer, when there may not be a lot of color left. A nice change was a contribution of Kaffir limes, along with limes and eggs.

### **OVER THE STABLE DOOR with Hamish**

#### **Hamish**

Greetings Fellow Equines and Horse Owners!

When the weather is not friendly and owners are tempted to take part in other activities, the horses are still out there in their paddocks, eating and moving

around. Out of sight but should definitely not be out of mind. There is always manure to pick up, check for dung beetles, check fencing and gates, check for areas that appear to be overused (for example where they like to stand or loaf around) and of course most importantly, check for the horse himself and his rugs. Horses do not like to eat where they have dropped their manure, so if it is left there, eventually the paddock will start to look 'sour', with tufts of green surrounded by barer patches. If possible, before it gets to that stage, move the horses to another area, or use electrical tape to divide the grazing area. Each situation comes with its own unique problems and certain methods don't always work – it just depends on your horse. Ideally it is preferable to paddock horses together to fulfil their social needs. This can also help to avoid problems such as fence walking, standing at gate areas or at a spot nearest to any other horses. Introducing a newcomer should be done with caution over a period of some days to a week or more. Again, it depends on the individual horses. If you are lucky enough to have an auntie or uncle horse, that is a good way to start. Then each other horse can be introduced one by one. Ideally then put the new horse in the regular grazing area without the others to give him a chance to get to know his surroundings without being hassled by anyone else. Most of the time this system works well, but there is always the exception. The owner just has to read the situation and manage it accordingly, with safety being the bottom line. Getting back to checking, even when not riding, it is a good practice to bring the horse in and unplug just to make sure that all is ok underneath. Once that warmer

weather kicks in, there will be oodles of fur coming out and that means getting it off the inside of the rug. If left there, it can be incredibly itchy and annoying for your horse, not to mention a haven for lice etc. When possible, leave the rugs off and give your horse an opportunity to roll and have a good scratch. If more than one horse, they also have that opportunity for a bit of grooming and socialising. The more your horse can indulge in these basic needs, the happier and more relaxed he will be. Also make sure that when he is brought in from his paddock, that it is not just a time for a quick groom and off for a ride. Make sure that this is a friendly and relaxing time for him, so that he learns to enjoy your company. Allow plenty of time for that hoof clean, body hair and manes and tails. This time can also be utilised to do a body check for any small (hopefully) injuries, sores, cuts or anything else which may have changed.

I am being a good boy and keeping my weight down, so my owners are well pleased with me. As we move into spring, that will be my danger time, so my owners will have to be very vigilant!

Safe riding everyone and look after your Neddy's!  
Hamish

## FRIENDS OF SCOTT CREEK CONSERVATION PARK

Are you interested in nature? Native plants? Wildlife? Looking for a break from the hustle and bustle? Want to give something back to the community or Mother Nature?

We welcome anyone who wants to come along and see what we do at any of our activities.

Anyone wanting more information about the Friends of Scott Creek CP, or wanting to get involved, can contact us on [info@friendsofscottcreekcp.org.au](mailto:info@friendsofscottcreekcp.org.au) or visit our very informative website

[www.friendsofscottcreekcp.org.au](http://www.friendsofscottcreekcp.org.au)

You can also now follow us on our Facebook page [www.facebook.com/friendsofscottcreekcp](https://www.facebook.com/friendsofscottcreekcp) where you will find up to date information about our activities, including photos of the park's flora and fauna.

### Programme of activities

August

|                 |                 |
|-----------------|-----------------|
| Sat, Sun 3, 4   | Bird banding    |
| Tue 6           | Working bee     |
| Sun 11          | Working bee     |
| Tue 13          | General meeting |
| Sat, Sun 17, 18 | Bird banding    |
| Wed 22          | Social lunch    |
| Sat 24          | Working bee     |
| Sat, Sun 31, 1  | Bird banding    |

A male Scarlet Robin spotted at gate 3 on Scott Creek Road in June.

Scened Sundew (*Drosera whittakeri*), one of several species of insectivorous plant found in Scott Creek CP.

## RECREATION GROUND

### CLUBROOM FOR HIRE

KITCHEN - BAR - AUDIO/VISUAL

Looking for somewhere to host that next Event or Party? Run a weekly group or class? We're always on the lookout for hirers. Get in contact with the Cherry Gardens Ironbank Rec Ground to see our Hire Agreement, prices and different options.

Find us on FB or email [andyrvadams@gmail.com](mailto:andyrvadams@gmail.com)

### FOOTBALL CLUB

By the time you read this newsletter the minor rounds of the footy season will be drawing to a close. The season arrived early and has flown by and before we know it we will be in to the finals and hopefully our seniors teams will all be strong contenders.

Currently the A's are second on the ladder and the B's are

third. Our women are playing really well in the Hills League this year but they are struggling to find some consistent goal kickers. They are third on the ladder. The U14's have only had the one win for the season and a draw. The U16's have had a mixed season and are sitting third on the ladder. The U18's are sitting 4<sup>th</sup> on the ladder.

Outside of playing footy the club continues to be busy throughout the week with training and a few functions.

Last month we joined with the Blackwood Golf Club to have our inaugural Club Golf Day.

Unfortunately the weather was not the best but everyone had a fun day and the hospitality of the golf club was great.

Coming up on August 17<sup>th</sup> is our club Quiz Night and we would welcome any locals who would like to join us.

IRONBANK CHERRY GARDENS FC PRESENTS

## TRIVIA NIGHT

**SAT AUGUST 17**

PRIZES FOR TOP PLACES

DOORS OPEN 7PM, TRIVIA STARTS 7:30PM

COROMANDEL VALLEY PRIMARY GYM

\$15p.p - BYO FOOD & DRINK

BOOKINGS: Tables of 10 - 0417865044,

[info@ironbankfootball.com.au](mailto:info@ironbankfootball.com.au) or Msg on FB

We will be screening free movies in the adjacent OSHC room so bring the kids

**EVERY SENIOR PLAYER & JUNIOR FAMILY IS KINDLY ASKED TO DONATE A SILENT AUCTION PRIZE AT TRAINING BY 10 AUG**

**We would like to thank the Onkaparinga Council for approving a Grant of \$5,000 towards the Goal Net behind the northern end goals. It will help immensely towards this project.**

As with everything at the Football Club, Netball Club and Recreation Ground, everyone is welcome and we hope that all the residents of Cherry Gardens, Ironbank and Coromandel East remember that you the community own it and it is yours to enjoy and be a part of. Whether you just want to walk the dog (please pick up the dog poo), kick a footy, shoot a few baskets or have a hit of tennis you are always welcomed and we want you to feel a part of what we are.

There are meals served every Thursday evening and it is a great place to make friends, catch up with what's going on and just feel a part of the community.

Hope to see you at the club and maybe check out the next home game!

Go Thunderer's

• Treasurer: Naomi Chant [lbcg.treasurer@gmail.com](mailto:lbcg.treasurer@gmail.com)

## IBCG Netball Club

We are now over halfway through the season. We have had some great results with our 20 teams. Currently teams are placed:

### Seniors

League - 4<sup>th</sup>

A1 - 5<sup>th</sup>

A2 - 4<sup>th</sup>

B1 green - 7<sup>th</sup>

B1 gold - 1<sup>st</sup>

B2 green - 7<sup>th</sup>

B2 gold - 6<sup>th</sup>

C1 Green - 4<sup>th</sup>

C1 Gold - 5<sup>th</sup>

C2 - 4<sup>th</sup>

### Juniors

17.1 - 1<sup>st</sup>

17.2 - Gold - 2<sup>nd</sup>

17.2 - Green - 1<sup>st</sup>

15.1 - 1<sup>st</sup>

15.2 - 2<sup>nd</sup>

13.1 - 4<sup>th</sup>

13.2 Green - 1<sup>st</sup>

13.2 Gold - 6<sup>th</sup>

11.2 - 3<sup>rd</sup>

11.3 - 1<sup>st</sup>

### Upcoming indoor games:

**10 August. A1 v Uraidla at 5.30 and League v Crafrers 7.15**

Gold coin donation and a great way to see our teams play a fast and exciting game indoors

### Times for games are:

9:00 am – 11 & under and 15 & under

10:45 am – 13 & under and 17 & under

1:45 pm – Seniors

3:30 pm – Seniors

The Kitchen and bar is open so come along for some great food and company. Meals are from 5pm.

Di and Kat would love to see you.

**UMPIRES** - We are always looking for umpires to assist us so if you or anyone you know would like to umpire for the club (paid of course) please contact me via email [ibcgpresident@gmail.com](mailto:ibcgpresident@gmail.com)

### SPONSORS

Please support the people who support us:

Gavin Chant from Summit Glass

## MAX RICKS RECOLLECTIONS

### Going to Sunday School.

The district of Cherry Gardens became established in the 1840's. The Methodist church was an essential part of the community, and Sunday School attendance for the children was a regular part of growing up. At my time starting in

the 1930's, there was the kindergarten for the 5 – 7year old's, followed by the Juniors, the Intermediates, and the Seniors for the 14 to 16year old's. We would meet for about an hour each Sunday and be led by local teachers who had been students in their turn in previous years. The songs appropriate to the age groups were sung, and we each had books according to our classes, which we used each week. Each age group would use a separate part of the church building for lessons.

Every year as I recall we had a Sunday School Anniversary which was held on the 1<sup>st</sup> Sunday in December. There would be 3 services held on Anniversary days, 10.30, 2.30, and 7 pm, when high ranking speakers would address the gathering. For example, the South Australian Moderator may come and also, Sturt Football Captain John Halbert came on several occasions. The students would spend 2 months learning special anniversary songs, and on the big day, assemble on raised platforms on each side of the pulpit. The singing conductor with baton in hand would direct our efforts. One conductor in my time was Mrs. Lousia Strange and the organist was Mrs Leo Terrell. This was the major event of the year for all the children who would be wearing their newest clothes, and the church was filled with parents and many friends who used the anniversary to renew old friendships. On the next Monday night, we would have a special supper evening. Whilst still sitting on the platforms as we did on the Sunday, each Sunday School child would be presented with a book. The senior students received a full Bible as they completed their years of Sunday School attendance. Where there were vacancies in the Teaching Staff, the former senior students would often move into these positions.

The final major event of the year would be a Sunday School picnic held at the Seacliff beach, and usually held on one day in the 1<sup>st</sup> week in January. We used to hire a small hall at the beach, and a great day of swimming and making sandcastles was had by the families and friends alike. A great day's gathering which was a regular district event for many years.

## AGRICULTURAL BUREAU

### Clarendon Branch of the Agricultural Bureau

The Clarendon Branch of the Agricultural Bureau welcomed speaker, David Trueman to the June meeting. David provided insight into the Clarendon Water Tunnel. David previously worked for SA Water and had some background knowledge of the Clarendon Water Tunnel. David explained the way the tunnel was excavated with shafts being dug to the required level. Workmen then dug to join the next shaft and eventually the tunnel was linked up and ready to receive water from the Clarendon Weir into the Happy Valley Reservoir. David explained that the original tunnel was enlarged in the 1960s with the help of workers from the completed Snowy Mountain Scheme. The area now known as Peace Park was the site for worker accommodation and machinery and was later converted into a YMCA camp. When the tunnel was enlarged it was concrete lined at the beginning and at the exit to reduce erosion. The water tunnel is surveyed annually by SA Water Engineers who drive vehicles through the tunnel to ensure it is working properly.

Tony Fagg President

Clarendon Branch of the Agricultural Bureau

### Action on Koala numbers

Large concentrations of koalas in the Adelaide Hills are causing damage to some areas of woodland and threatening the animals' long-term welfare. Natural Resources Adelaide and Mt Lofty Ranges has responded by starting a fertility control program to reduce breeding over time and preserve the koalas' habitat.

The most recent population survey produced estimates of approximately 150,000 koalas in the Mt Lofty Ranges, with very high densities in some areas of koalas' preferred Manna Gum woodland.

"In one area of woodland in the central hills, 13 koalas per hectare have been recorded and we are now seeing severe impacts due to over-browsing. Optimal koala densities to prevent over-browsing of their habitat and ensure the long-term welfare of the koalas is around one per hectare," according to the Natural Resources department. "As a direct result, there's considerable evidence of over-browsing of preferred food trees, with severe defoliation, dead or dying trees and multiple koalas observed in impacted trees in numerous parts of the Mt Lofty Ranges region. In effect, one of the greatest threats to the koala population in parts of the Mt Lofty Ranges is the koala population itself."

Hormone implants are being inserted in about 200 female koalas in areas where high over-browsing has been observed. Trained staff capture the koalas and place the implant while the animal remains at the base of the tree. It is then tagged and released after a process that takes about 10 minutes.

Regional Director Brenton Grear said a long-term program using the implants on Kangaroo Island had reduced koala density and improved tree health. "We have to ensure that the koalas' favoured eucalypt woodlands are sustained, and the reality is that koala density in some parts of the Mt Lofty Ranges is unsustainably high," he said.

Koalas are not native to the Adelaide and Mt Lofty Ranges (AMLR) or Kangaroo Island (KI) regions. They were introduced into both regions from Victoria in the early 1900s after hunting for the fur trade severely impacted on the population in that state.

"Although some groups have stated the total Australian koala population is less than 100,000, our on-ground surveys make us confident that the number in the Mt Lofty Ranges alone is around 150,000.

## COUNCILLOR UPDATE – GEOFF EATON

### CITY OF ONKAPARINGA

Engagement is open for State Government's Regional Development Strategy

The State Government is calling for input into a Regional Development Strategy which aims to empower regional communities. Elected Members, particularly those representing regionally-based residents, are invited to contribute via the state government's "YourSay" platform.

The Regional Development Strategy is intended to:

- help grow regional economies
- support people in their choice to live in regional communities, and
- ensure regional South Australia is revitalised and prosperous.

The Strategy will not allocate funding but rather provide strategic direction for all-of-government expenditure for the state's regions.

The Regional Development Strategy discussion paper poses a series of questions on key elements that will be considered, including:

- What priorities should drive state government investment in infrastructure?
- How can regional South Australia retain its existing young and working age people?
- What is required to encourage greater overseas and city-to-regional migration to regional South Australia?
- How can we build a pool of the next generation of business and community leaders?
- How can we ensure future regional workforce skills are identified and invested in?
- What needs to happen to encourage investment in regional South Australia?

Anyone interested can get involved by visiting the government's "YourSay" website and completing a survey, joining the online discussion, attending a community forum (our closest is at Victor Harbor on 12 July), or emailing [PIRSA.RegionsSA@sa.gov.au](mailto:PIRSA.RegionsSA@sa.gov.au)

### Burning in the open

Remember burning in the open is recommended from 12 midday until 12 midnight. Please be sure to check the council website or contact them personally to ensure you know which zone you are in and if you are able to burn without a permit. If you do fall into this category – please be sure to follow the burning requirements as some aspects of the ground may be dry despite the cool and wet weather.

This link will take you to the Onkaparinga Council website and the map to show which zone you are in. For further information email:

[communitysafetygeneral@onkaparinga.sa.gov.au](mailto:communitysafetygeneral@onkaparinga.sa.gov.au) or visit [www.onkaparingacity.com/firemanagement](http://www.onkaparingacity.com/firemanagement)

## LETTER TO EDITOR

**Ovarian Cancer the silent killer – It could be your Mother, Wife, Sister, Friend or even your Daughter!**

*In Australia one woman dies every 8 hours of ovarian cancer. This has moved up from one woman every 10 hours! Ovarian cancer is the Leading cause of death of all*

gynecological cancers. It is an insidious disease that often strikes without warning.

*What are the symptoms?*

Most women who experience one or two of the listed early symptoms do not have cancer. However, you should seek medical advice if the symptoms persist.

*The most commonly reported symptoms for ovarian cancer are*

- Increased abdominal size or persistent abdominal bloating
- Abdominal or pelvic (lower tummy) pain
- Feeling full after eating a small amount
- Needing to urinate often or urgently

*Additional Symptoms may include*

- Changes in bowel habits
- Unexplained weight gain or loss
- Excessive fatigue
- Lower back pain
- Indigestion or nausea
- Bleeding after menopause or in- between periods
- Pain during sex or bleeding after

*There is no early detection test.*

The pap smear does not detect ovarian cancer. The key to changing this statistic and improving long term outcomes is a simple and effective screening test. With no early screening test most, women are diagnosed in the advanced stages of the disease. The vague symptoms have been present often up to 2 years prior to diagnose.

*How do we change this?*

The single most important factor that would improve survival of women affected by ovarian cancer is the development of an early detection test. The Ovarian Cancer Research Foundation, (OCRF) supports research into better treatment and the development of an early detection test. Their aim is for EVERY WOMAN, EVERYWHERE to be FREE FROM THE THREAT OF OVARIAN CANCER.

***It could be your Mother, Wife, Sister, Friend or even your Daughter!***

***Well it was my Sister in law first, then it was my daughter, both died within 18 months of one another of this insidious disease. My daughter Letitia Linke and my sister in law Rose Denton both worked tirelessly through their illness to raise awareness of the disease and raise funds for research to find an early detection test.***

### **Adelaide Silver Style**

This Adelaide Silver Style was founded by my daughter the Late Letitia Linke who was a community Ambassador for the OCRF and Ovarian Cancer Australia. During this time, she took part in many forums for research, media promotions and interviews, all while undergoing chemotherapy, radiotherapy and other medical treatment for this disease. Letitia was passionate about raising awareness of the signs and symptoms of this insidious disease and supporting research to find an early detection test. Throughout her illness, Letitia

talked openly about research into an early detection program.

Her biggest fundraising undertaking was the Adelaide Silver Style event first held in October 2016. The Adelaide Silver Style Cocktail Party was an evening of quality food, wine and entertainment, raising in excess of \$75,000 in support of the OCRF. This was followed up in 2017 with the Adelaide Silver Style Lunch. Letitia was one of the faces of the Witchery White Shirt Campaign in 2018, however she lost her battle with ovarian cancer in August 2018. Her sister, Letitia's Chemo Buddies, some friends and I have continued to run the annual Adelaide Silver Style event in her memory.

### ***You can make a difference***

This year's event will take place on Saturday the 26<sup>th</sup> October 2019 at "The Ellington" an elegant Art Deco function centre in Adelaide. It will be a dinner dance with 3 course meal by "Epicure", music and entertainment with "The Sizzle" and a cameo spot by "Amity Dry". The MC for the evening will be local identity "Cosi" – of South Aussie with Cosi fame. We aim to attract 300 people and raise \$30,000 for the OCRF.

You don't need to be a scientist to make a difference! Join us for a night of fine food, wine and entertainment to raise funds for the OCRF.

You can find out more about us on

<https://adelaidesilverstyle.com/>, find us on Facebook and Instagram and buy tickets on

<https://www.trybooking.com/book/event?eid=496928&>

Madelyn Duckmanton- Mother of Letitia Linke and Convenor of the Adelaide Silver Style.

# **FIREY** *Women* WORKSHOP

**A free bushfire safety workshop for women**

The workshop includes information and practical sessions in a fun and practical environment

**Topics include:**

- Understanding bushfires and warnings
- Deciding when to leave early or stay and defend
- Identifying hazards at your home
- Preparing yourself emotionally
- Operating fire pumps and equipment
- Preparing a Bushfire Survival Plan

**WHEN:**

Sunday 8<sup>th</sup> & 15<sup>th</sup> September 2019

9am – 4pm

**WHERE:**

Longwood Institute Hall  
706 Longwood Road, Bradbury

**FURTHER DETAILS:**

For further information please contact Natasha Huber  
0428 114 218 or CFS Community Engagement on  
08 82129858, or email  
[CommunityEngagementSupport.CFS@cfs.sa.gov.au](mailto:CommunityEngagementSupport.CFS@cfs.sa.gov.au)

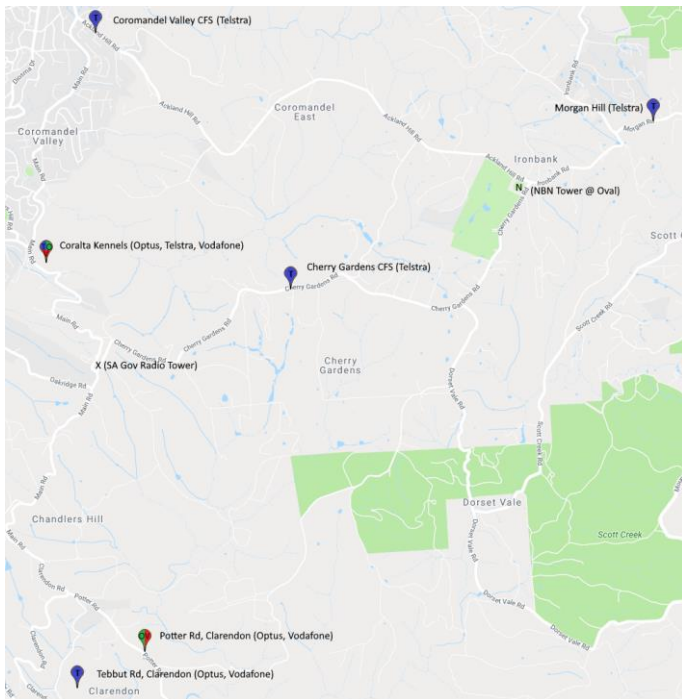

**(Editor's Note)** This article was recently posted on our Facebook Page. You can follow the discussion at <https://www.facebook.com/92CherryChatter/>

Darren, our local Internet adviser has provided some additional information around connecting to 4G instead of the NBN or ADSL for your internet needs at home. The Cherry Gardens / Ironbank community has no NBN FTTN, the NBN Fixed wireless at the Oval only reaches a select few and now TPG/ Internode / Adam are shutting down their ADSL service out of the Coromandel Valley Exchange. Clearly, we need either the NBN to step up for our hills community and stop pretending that NBN satellite is OK or help ourselves with 4G Wireless broadband.

However, just like NBN wireless, for 4G wireless broadband you need to be able to "see" a 4G tower - preferably with a clear Line of Sight (LOS). In Cherry Gardens, we only have two towers. Both are Telstra with one at the Cherry CFS shed and one at Morgan Hill on Morgan Road.

The rest of the towers are down the hill at:

- Coro Valley CFS, bottom of Ackland Hill Rd (Telstra)
- above Coralta Kennels (just above intersection of Black Rd and Main Road) ; Telstra, Optus and Vodafone
- Potter Rd, Clarendon (Optus and Vodafone)
- Tebbut Rd, Clarendon (Telstra)
- Morgan Rd, Ironbank (Telstra, Optus)

For a full list, consult this page ; <https://oztowers.com.au> Once you have identified your tower, you need to check your 4G signal strength. You should start with a phone app; Network Cell Info Lite (Android) is the best I've found. If you are in the green zone, it's probably OK.

Now, you might need to stand on your roof to get good signal (I did). All that means is that you will need an external 4G antenna installed.

You can also test your LOS with a planning tool. Airlink have one at <https://link.ui.com> where you can set the "device height" and see if your roof can see the tower in question.

If you have signal and LOS, then you need a 4G plan from Optus, Telstra or Vodafone.

**(Editor's note – The opinions and recommendations in this article are not necessarily shared by the members of the Cherry Chatter Committee. You need to do your own research before making any changes to your situation.)**

There is an excellent wireless broadband 4G plan from Optus. \$85/month gives you 500GB of data and the speed is uncapped. Previously, the speed was capped to 12Mbps. I have been getting above 40Mbps regularly from the tower at Potter Rd, Clarendon. You can also choose \$60/month for 200Gb of data.

Telstra's plans start at \$15/month for 5Gb of data and work up \$75/month for 100Gb. Our family of 2 adults and 2.5 teenagers used around 300Gb of data month, so before you decide you should ask your ISP how many Gb of data you are using each month on average with ADSL. It might be that a Telstra plan will work for you. On demand streaming video with Youtube, Netflix, ABC iView or SBS on Demand will use up a lot of data. For both Telstra and Optus, the cost of the 4G modem is extra. For completeness, Vodafone have a 4G offer for 60Gb of data for \$47.40/month, but if you can see their towers, Optus clearly have better 4G plans on the same towers.

At my home I needed an external antenna that was installed by Craig from his business Total Antenna at Belair. [www.totalantenna.com.au](http://www.totalantenna.com.au) Note, most TV antennas are not wind load rated. The 4G antenna is the size of a large square loaf of bread, so it needs sturdy poles. Craig can check your LOS, as well as provide and install your 4G antenna. Highly recommended. Very professional. So, that's how to do it on 4G wireless broadband. I hope that this helps some of my neighbours.

### **OPTUS 4G at Morgan Road Tower**

There is an Optus 4G service available at the Morgan Road tower as well as Telstra 4G.

<https://www.rfnsa.com.au/5153005?first=1>

Morgan Hill is a 33.8m tower, so to test your fresnel LOS - even assuming a 25m height at the other end; use <https://link.ui.com/#> to do a desktop test. You will need to search for Cherry Gardens to get started. You can be assured that the Telstra repeater is higher on the pole than Optus as Optus have come in later, lower down the pole. The Optus coverage throughout Cherry Gardens is a bit hit and miss so very important to check before proceeding with any changes.

As I said, the Optus 4G plans are much better than Telstra's and you can check out and compare from these links

<https://offer.optus.com.au/.../mobile-broadb.../huawei-b525-wifi>

versus

<https://www.telstra.com.au/in.../mobile-broadband/nighthawk-m2>

What we need as a community is to get our politicians to push Optus to install 4G at the Cherry CFS tower for those users that live down that end of Cherry Gardens. Telstra are already there although the repeater is mounted quite low and it may be that the tower is not structurally adequate for 2 repeaters and it could be that a new tower is required. That will help a lot of people who are too far from the other towers.

(Editor's note – Optus could also be encouraged to install a repeater on the NBN Tower near the Rec Ground).

By the way, Craig from Total Antenna's has said that it would be advisable to do a speed test off the particular tower your looking to receive service from. He has come across a number of Optus towers with congestion on them which only gives speeds of 2-3mb download and upload any time of the day, so by testing the service first it will give you an idea of what speed you can expect when the equipment is installed.

There are a number of APPS available to do this yourself using your phone such as SPEEDTEST by OOKLA or LTE CELL INFO.

Also, it is important to do your research on the cost to install the external antenna to be able to connect to these Towers before you disconnect from your current provider. This can be quite expensive if you need a tall mounting pole.

Darren

## MEADOWS VET NEWS

With the very wet weather we are seeing a sharp rise in the incidence of hoof abscesses in both cows & horses. Infection in the foot is by far the most common cause of acute (sudden), single-leg lameness. Infection results in painful inflammation and pus (abscess) formation. The hoof is a relatively rigid structure and abscess increases pressure within the sensitive structures, which, like an infection or bruise under a human fingernail, is very painful! Some clients think that their horse has actually broken its leg as the onset can be so sudden & very painful. Early vet attention will prevent some of the secondary complications from occurring!

Make sure you keep up flea treatments during the colder months! This is when you can lay the foundation to stop a flea explosion in Spring.

### Monthly Reminders!

- Horse owners please ensure your horses teeth are checked regularly. One

DID YOU KNOW?  
FLEAS CONTINUE TO EXIST  
IN WARM WINTER HOUSES  
SO IT IS IMPORTANT TO  
KEEP UP FLEA CONTROL ALL  
YEAR ROUND

 vetcheck

of the most common causes of colic we see through winter is caused by dehydration. This is often a result of reluctance to drink very cold water caused by dental problems!

- With pet insurance we get to deal with a number of companies and are more than happy to let you know which companies seem very good to deal with if a claim has to be made!
- With the wet weather snails & millipedes are a nuisance in the garden store any baits well away from your pets!
